225-329-4470 | wahinsondev@gmail.com | <https://www.linkedin.com/in/william-a-hinson> | [github.com/Andrew-Hinson](https://github.com/Andrew-Hinson) | Baton Rouge, LA (Remote)

**Data Platform Engineer** | Kafka · Flink · AWS · Terraform

Built and operated Fetch's data platform; scaled Kafka for the 2025 Super Bowl launch; cut data-lake spend \$70k/month.

## Experience

**Data Engineer** | Louisiana Blue | Jan 2026 - Present

- Develop and operate production data pipelines supporting health-plan operations.

**Fetch Rewards** | Remote | Jun 2021 - Jul 2025

**Data Platform Engineer** | Jan 2023 - Jul 2025

- Scaled Kafka connectors and topics to handle millions of users ahead of Fetch's 2025 Super Bowl ad launch.
- Owned Kafka pipeline on-call while mapping org-wide lineage into DataHub (self-hosted Kubernetes, then DataHub Cloud).
- Cut S3 data-lake cost \$70k/month by building an internal tool that automated storage tiering.
- Parameterized Terraform so teams could stand up Kafka Connect pipelines without waiting on platform.
- Built Flink-on-Kafka pipelines tracking user interactions and signups, delivering minute-level product KPIs to VPs.
- Built a Snowflake access-control pipeline that centralized permissions across teams.

**Data Engineer, Social Media Feed** | Mar 2022 - Dec 2022

- Built a social-feed backend pipeline serving 12M+ monthly users (Go, AWS Lambda, ECS, SNS, SQS, S3, Snowflake).
- Built a Go service to stress-test Kafka topics and internal apps, cutting compute provisioning \$5k/month.

**Tableau Server Admin** | Jun 2021 - Mar 2022

- Intern to full-time admin; scaled Tableau Server on EC2 from one node to multi-node, enabling 75% more concurrent refreshes.
- Required DBT models instead of Tableau for data modeling, cutting Tableau EC2 cost 20%.

**Infantry** | **U.S. Army National Guard**

- Honorably discharged after 6 years in disaster recovery and security operations.

## Technical Skills

**Languages:** Go, Python, Java, SQL, Terraform

**Cloud & infra:** AWS (ECS, EKS, Lambda, S3, SQS, SNS, CloudWatch), Kubernetes, Docker, Helm

**Data platform:** Apache Kafka, Kafka Connect, Apache Flink, Snowflake, dbt, DataHub, Airflow

**Observability:** Grafana, Loki, PagerDuty, GitHub Actions
